

# SlimLine XR

## 3. generation of Switch Disconnecter Fuse

### Fulfils increasing market requirements

ABB has continuously invested in research and development, in order to create new and optimized product generations.

ABB now offer a third generation switch fuse disconnectors in a tier format.

### The latest within optimal operation and design

The new SlimLine XR fulfils all increasing demands in the industry for detailed energy measurement and monitoring.

With new developments, it also covers the demands for remote monitoring and operation. Installation of the new SlimLine XR is easier and more time saving than ever before. The increased space in the cable termination area will allow even better access for the cable installation.

### Technical features:

**XR00** - 160A  
**XR1** - 250A  
**XR2** - 400A  
**XR3** - 630A

500 / 690V 50/60Hz

XR: Switch fuses interrupt on both sides of the fuses

XR-E: Rated making and breaking capacity - AC22B

XR-M: Rated making and breaking capacity - AC23B

### A wider range of integrated options and "add-on" accessories

#### The new SlimLine XR offers :

- Integrated and retrofitable 3 phase current transformers.
- Integrated motor for remote or local operation.
- Retrofitable fuse monitoring.
- Easy retrofit of auxiliary switches up to 2NO+2NC.
- Retrofitable cable clamps up to cable size 2 x 300mm<sup>2</sup>
- Snap-on cable shroud after cable installation.
