

SmartSpares™

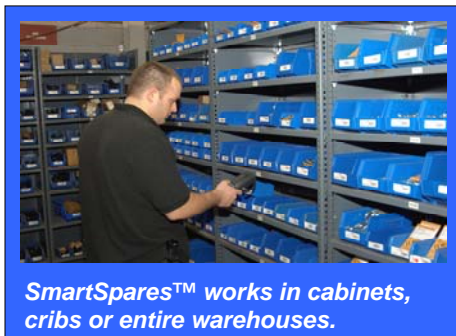

INVENTORY MANAGEMENT SERVICE

Save Time and Money with SmartSpares™

In today's fast paced manufacturing environments, keeping your production running smoothly means having the right part at the right time – and knowing where to find it!

ABB's SmartSpares™ Inventory Management Service is a **web-based** data capture system that allows you to **physically secure** your spare parts and MRO material while simultaneously monitoring access and use, including multiple locations.

SmartSpares™ utilizes either wired or **wireless** communication networks. It can be **integrated with your ERP system** and can help improve the

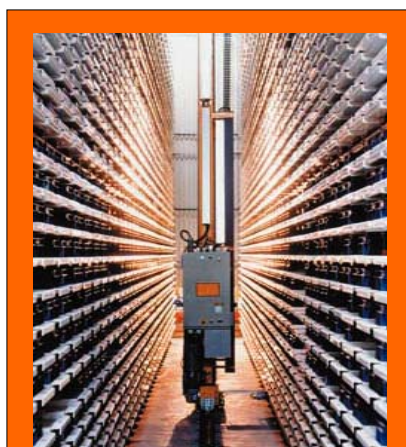

SmartSpares™ works in cabinets, cribs or entire warehouses.

efficiency of your operations by dramatically reducing costs and lost productivity related to stock-outs, lost inventory, misplaced tools, expediting spares and maintaining unnecessary inventory.

How it works:

- Spare parts and MRO material are **secured** in "smart spaces" that range from industrial cabinets, cribs or entire warehouses.
- Each spare part is labeled with a **unique bar code** that can track purchase order number, project

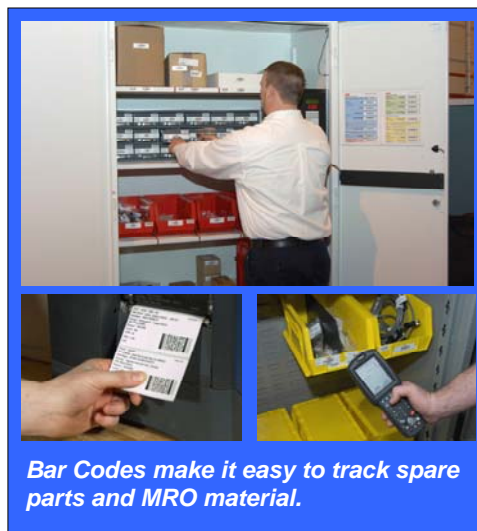

With real-time visibility, SmartSpares™ can tell you:

- What inventory is available?
- Where it's located?
- Which items are being used and when?
- Who is using inventory and why?
- What needs to be bought and replenished?

number, serial number, warranty or any other information that you may need.

- When a spare part is needed, it's scanned out of the smart space and the inventory is **automatically updated**.
- The administrator then receives an **e-mail notification** that the part has been removed from the smart space and by whom.
- The part can then be re-ordered manually by the administrator or by **automatic replenishment**.

Bar Codes make it easy to track spare parts and MRO material.

Standard features include:

- Extensive report creation options
- Automatic replenishment
- Space entry notification
- Remote access authorization
- Online ordering and catalog
- Delivery request capability
- Exposed inventory discrepancies
- Documentation tied to part – MSDS sheet, white paper, CAD drawing picture
- Assistance with SOX compliance
