

# Case Study; Large Steel Carriers for Shuttle Machines

The robot IRB 7600 cuts the wholes at the correct location with a plasma burner and treat the cut edges with a wire brush so that the applicable sheets can be tacked into it.

## Client

- Lässer AG, Switzerland

## Application

- Plasma cutting
- Wire brush cutting
- Arc welding

*System installed by ABB, Switzerland*

## Key Drivers & Benefits

- ✓ Short cycle time
- ✓ High uptime
- ✓ Increase in production capacity
- ✓ Increase profitability for the customer
