

Refurbished Robots

Refurbishment of ABB Robots

A Refurbished Robot for your production

ABB offers you a range of refurbished robots. These robots are upgraded with the latest technology and are all refurbished with ABB know-how.

When a Refurbished Robot?

- Add another robot of the same controller family - no extra start up costs, no further training is necessary and you can use the same spare parts.
- Start up and test robot based automation - the latest technology might not be needed
- Replace your S1,S2,S3 or S4 system with a more cost effective robot system – e.g. S4 controller family which has been sold more than 30.000 times. Utilise new functionality and software features to make your production more efficient.

All robots are factory refurbished and we guarantee you a system you can trust.

Total mechanical and electrical reconditioning, software upgrades and test runs, everything performed with ABB know-how are main items to ensure you the right quality.

We also give you 12 months of warranty.

The whole ABB robotic product range is offered as used equipment. Everything from a single robot to an arc welding cell or a paint system inclusive pumps and application.
