

Case Study; Hydraulic Attachments for Forklift Trucks

“Robots offer a whole range of advantages, but the bottom line is that without robots, we would never have been able to raise production quality and volume to this level.”

Jan Blom, plant manager at Cascade

Client

- Cascade Europe, The Netherlands

Application

- Arc welding

System installed by ABB The Netherlands

Key Drivers & Benefits

- ✓ Maintained heat input with constant weld quality
- ✓ Achieves higher production volumes with fewer staff
- ✓ Health advantages for the welders with less exposure to radiation and vapors
- ✓ Enables the increased integration that clients demand
