

Training services for Technical Partners courses for low voltage motors

Training courses

ABB offers training for Technical Partners on low voltage motors' business and products. Technical introduction and basic information is available as e-learning courses or tailored seminars. Passing the Introduction Course exam is a requirement for Technical Partner authorization.

ABB also arranges advanced training for maintaining and developing levels of competence. Technical Partners have access to the same course offering as ABB's own sales personnel.

Training on motors for hazardous areas (Ex motors)

ABB offers Ex motor training for Partners that handle service and maintenance of ABB motors. Passing the Service Training exam and Refreshment Training is a requirement for receiving the Ex Motor Service Certificate and Workshop Authorization.

SM23 EN REVA 2008

Service notes

ABB motors Authorized Sales

ABB motors alliance Sales and Support

ABB motors alliance Sales, Support and Service

ABB motors Authorized Repairer
