

SolutionsBank User Tips

Configuring Your AutoNotification Profile

ABB SolutionsBank AutoNotification Feature

Auto Notification generates automatic email notifications regarding specific products and/or document types via email. Technical updates and product release information can be filtered according to the user's installed equipment profile. This document provides instructions for setting up a user AutoNotification profile.

To begin, Log into SolutionsBank (<http://solutionsbank.abb.com>),
Select AutoNotification from the main menu:

The screenshot shows the ABB SolutionsBank Home page. The left sidebar contains a menu with 'AutoNotification' highlighted in green. An arrow points from the text above to this menu item. The main content area includes a 'Multi-Student Discount' banner, a 'Support IT Knowledge Navigator' banner, and a 'Business Online' banner. Below these are sections for 'Most Common Downloads' and 'Popular Technical Documents'. The right sidebar contains a 'Welcome ABB Customer' section with a 'Logout' button and a 'What's New at SolutionsBank' section with an 'Enhanced Search' feature.

Select "Configure Notifications" from the sub-menu:

The screenshot shows the 'Configure Notifications' page. The left sidebar has 'Configure Notifications' highlighted in green. The main content area shows a form with the following fields: 'Alternate E-Mail' (text input), 'Product Group' (dropdown menu), 'Product Family' (dropdown menu), 'Sub Family' (dropdown menu), and 'Product' (dropdown menu). Below the form is a table titled 'Current Configuration' with columns for GROUP, FAMILY, SUB FAMILY, PRODUCT, and DOC TYPE. The table contains four rows of data.

GROUP	FAMILY	SUB FAMILY	PRODUCT	DOC TYPE		
Control Products and Systems	Symphony - Harmony - Inf190	ALL	ALL	DOWNLOAD	Suspend	Delete
Control Products and Systems	800xA	ALL	ALL	ALL	Activate	Delete
Oil and Gas Solutions	Gas Distribution	ALL	ALL	ALL	Suspend	Delete
Service Products and Solutions	Support & Remote Services	ABB SolutionsBank	ALL	ALL	Suspend	Delete

SolutionsBank User Tips

Next - using the drop-down menus - select the product group, product family, sub-family, product and the document type to add to the AutoNotification profile list. Future notifications will include these categories as new information becomes available in SolutionsBank. Higher selection levels (i.e. Product Group vs. Product Sub-Family, or All Documents vs. Downloads) will provide the widest scope of AutoNotification per product group.

SolutionsBank User Tips

This configuration will send automatic daily email messages regarding any document or file published for the selected products within last 24 hours. No messages will be sent if there are no updates are detected by the system. For certain product groups (i.e. "Control Products and Systems") this configuration may produce very long lists of documents and file updates – sometimes listing several hundred documents and files in a single email message, making it very difficult to use. Therefore, it is recommended to be specific when setting up a profile.

When an AutoNotification message is received, it will list the latest documents and updates published in the last 24 hours, sorted by Product Group and Document Type – as shown in the example below:

```
Dear SolutionsBank User,

ABB SolutionsBank is pleased to announce the release of the following new
technical documents in our online technical document library that matched
your preferences.

The following sections from Your AutoNotification Products contain new
documents:

SolutionsBank User Tips

AutoNotification messages include a URL link to the SolutionsBank server. Clicking the link, will redirected users to the "View Notifications" page. The "View Notifications" screen can be opened at any time, to specify the publish date for documents and files published for products specified in the AutoNotification profile:
