Products Concerned

This product bulletin concerns the following versions of Operate IT Process Portal B and Produce IT Batch (including roll-ups and patches where applicable). Connect products for Harmony, MOD300, Melody, Freelance 800F, and OPC are also included.

- PPB 2.0 SP1a with Produce IT Batch 1.3
- PPB 2.0 SP2 with Produce IT Batch 1.4

Description

ABB evaluates security updates from Microsoft with respect to relevance to and compatibility with each OCS HSI product. All relevant updates are validated. ABB's goal is to communicate the plan for validating the relevant updates within 24 hours after release of a security update from Microsoft, and to complete validation for critical updates within seven days.

This document lists the security updates to Windows and other Microsoft software that have been evaluated by ABB. Validation tests are made with the respective OCS HSI product and required third party software installed on the documented operating system according to relevant installation guides for each OCS HSI product version, and with no additional ABB or third party software installed.

Note that a particular installation may have been complemented with additional ABB or third party software. For information on the compatibility of Microsoft security updates with such software, please refer to your ABB contact or to the third party, as relevant.

The following terminology is used to indicate Validation Status:

- P Prerequisite** – These security updates are listed in the Process Portal B2.x Installation instruction and should be loaded during the installation of Process Portal B2.x.
- Q Qualified** – The update is relevant to and has been tested for compatibility with the listed OCS HSI product, with no problems found.
- X Exception** – The update causes problems in the OCS HSI product, and should not be installed, or should be installed with certain restrictions. Details are provided under Comments.

ABB Inc.

- T Testing** – The update is relevant to the OCS HSI product and validation tests are ongoing.
- N Not Applicable** – The update affects Microsoft software that is not used by the OCS HSI product. The update has not been tested and the impact of installing it is unknown.

“Replaced by...” in the Comment column refers to Microsoft’s replacement guidelines. Check the MS number in the Comment column for ABB Validation status.

For technical information on Microsoft security updates, please refer to www.microsoft.com/security.
